

Help & Documentation

OVERVIEW

The Help & Documentation page has been created to gather all the resources you may need in order to use the Courier API system effectively in one place.

DOCUMENTATION

Our documentation guides you through all of our API processes and explains the data required to be sent through to make requests via our API.

VIDEO TUTORIALS

These video tutorials are aimed at getting you all set up to use Courier API via the user interface. We're still in the process of adding more videos.

PLAYGROUND

The Playground lets you simulate a label request and allows you to manipulate the data sent and data received so that you can see the logic behind how labels are created.
